

TILE BRITE

ACOUSTIC TILE RESTORER

TILE BRITE is the most functional ceiling tile renovator in the industry featuring a clay-based system, not paint. This allows **TILE BRITE** to bond to the surface being repaired, leaving the acoustical sound absorption and fire retardant features intact. **TILE BRITE** makes old or stained ceiling tiles look new. It covers water stains, smoke discolorations, will not cause warping, and avoids costly tile replacement or complete repainting. **TILE BRITE** can be applied without any surface preparation. It's quick drying and has very low odor, so it can be used in highly sensitive areas. **TILE BRITE** will extend the practical life of ceilings by keeping them looking good.

DIRECTIONS:

Remove loose dust/dirt by wiping tile gently with a dry rag. Cover surfaces under area to be treated. Protect other areas with tape. Tile must be dry. Leaks which have caused water stains must be repaired prior to application. **SHAKE VIGOROUSLY BEFORE AND DURING USE.** When possible, remove tiles to a well ventilated area before application. Shake can until agitator ball rattles freely. Continue shaking for at least one minute. Shake occasionally during use. Hold can 8 to 10 inches from tile to be coated. Apply with a sweeping motion, using several thin coats. Allow each coat to dry for at least one minute before applying the next coat. If coating runs, the can is too close to the surface. Feather edges into the remainder of the ceiling by holding can further away during applications.

Skin: Wash with soap and water. If irritation persists seek medical attention.

Inhalation: Remove to fresh air. Seek medical attention immediately. If breathing stops give artificial respiration.

Ingestion: Do not induce vomiting. Seek medical attention immediately.

SECTION VIII - SPECIAL PROTECTION DATA

Respiratory Protection: If workplace exposure limits are exceeded (See Section II), a NIOSH approved air-purifying respirator is advised in absence of proper environmental control.

Ventilation: Provide local exhaust to keep air concentrations of ingredients listed in Section II below established exposure limits.

Protective Gloves: Use chemical resistant gloves if hand contact will be made.

Eye Protection: Wear safety glasses or chemical-proof goggles.

SECTION IX - SPILL OR LEAK PROTECTION

STEPS TO BE TAKEN IN CASE OF SPILL OR LEAK: Allow propellant to evaporate. Maintain local exhaust and adequate ventilation. No smoking.
